

### The Next Generation 1080p HD Team Collaboration Solution

### ONE SIZE DOES NOT FIT ALL

The right video conferencing system can transform any conference room into a visual collaboration hub by connecting colleagues, customers and partners, anywhere in the world. TANDBERG's enhanced video portfolio delivers flexible video solutions for organizations to improve team collaboration, drive innovation and strengthen customer relationships. While many systems perform the same basic function, there is no one size fits all when it comes to video communications. The requirements are as unique for each organization as the business themselves. When making a determination on the right video system, a few fundamental questions need to be addressed:

- How many people will typically attend each meeting?
- Will presentations, documents and multimedia be shared?
- How big is the conference room where the video units will be located?

The Profile is designed to optimize the meeting room experience. Powered by the TANDBERG C series line of Codecs, the Profile creates a rich, natural conversation utilizing HD quality video, wide screen LCD displays and PrecisionHD 1080p cameras. Because not every meeting room was designed the same, TANDBERG has created a complete line of video collaboration tools designed specifically with the meeting room in mind.

### PROFILE 42"

The TANDBERG Profile 42" is ideally suited as an entry point to building a video conferencing network, or for a mass deployment to hundreds of sites across the enterprise. The entry level unit, the Profile 42" is designed specifically for small meeting rooms. With options for the Codec C20 codec or Codec C60, the Profile 42" provides the flexibility to configure your multipoint calls using multiway or Multisite. If your organization is just getting started with video collaboration, or if you already have a video network and are looking to expand across the enterprise, the Profile 42" is ideally suited to fill both needs.

# TANDBERG SOLUTIONS

## Make any Meeting Space a Global Communications Hub

### PROFILE 52"

The TANDBERG Profile 52" is designed for the medium sized meeting room. The Codec C60 makes the Profile 52" highly collaborative, allowing users to share content from a PC as well audio visual content from up to 5 separate HD video sources. For increased collaboration capability, the Profile 52" is also available in a dual screen option, which can be configured to have one screen dedicated to meeting participants and the other designated for presentations and multimedia content.

### PROFILE 65"

For large meeting spaces, board rooms or environments where premium video communications are critical, the Profile 65" offers the same collaborative capability of the Profile 52" with a 25% larger screen. The large 65" LCD display provides optimal viewing for everyone in the room and the crystal clear audio ensures that everyone participating is not only seen, but heard.

### PROFILE 65" DUAL

The Profile 65" Dual is the ultimate video meeting room solution. With side-by-side 65" LCD monitors, the Profile 65" Dual makes collaborating in a large meeting room simple, intuitive and crystal clear. For the ultimate in collaboration the Profile 65" Dual has the advantage of increased video real estate providing additional clarity for face to face communications, as well as greater visibility for presentations and multimedia content.

### THE RIGHT SOLUTION FOR YOUR MEETING SPACE

No matter what size room, or how demanding your collaboration requirements, there is a Profile video system to meet your requirements. The sleek, clean design of the TANDBERG Profile system combines with the superior 1080p video and high fidelity audio to create a completely natural experience, allowing you to focus on the business at hand.
